PLN 200,000,000 6.500 per cent. Sustainability Awareness Bonds due 25th February, 2043

Issue Price: 99.448 per cent.

Bank Handlowy w Warszawie S.A.

The date of these Final Terms is 16th February, 2023.

These Final Terms, under which the bonds described herein (the **Bonds**) are issued, are supplemental to, and should be read in conjunction with, the offering circular (the **Offering Circular**) dated 8th December, 2014 issued in relation to the debt issuance programme of European Investment Bank (**EIB**). The Bonds will be issued on the terms of these Final Terms read together with the Offering Circular. Terms defined in the Offering Circular have the same meaning in these Final Terms.

EIB accepts responsibility for the information contained in these Final Terms which, when read together with the Offering Circular, contain all information that is material in the context of the issue of the Bonds.

These Final Terms do not constitute an offer of, or an invitation by or on behalf of anyone to subscribe or purchase any of, the Bonds.

The Bonds shall not be offered or sold to any Russian or Belarusian natural or legal person, entity or body if and to the extent that this would contravene any applicable restriction under sanctions imposed by the European Union (as may be amended, supplemented, replaced or superseded from time to time).

The Treaty on European Union aims to establish an internal market that works for the sustainable development of Europe. Ensuring an appropriate regulatory environment is a priority area of the European Union's (**EU**) Capital Markets Union. The European Commission's Action Plan on "Financing Sustainable Growth" has been designed to help reorient capital flows towards sustainable investment.

For this purpose, Regulation (EU) 2020/852 of the European Parliament and of the Council of 18th June, 2020 on the establishment of a framework to facilitate sustainable investment (the **EU Taxonomy Regulation**) aims to stimulate companies to measure the impact of their activities on sustainable objectives via the development of a shared understanding of sustainability. The EU Taxonomy Regulation underlines that the European Union is committed to the implementation of the United Nations 2030 Agenda for Sustainable Development (the **Agenda**), notably to taking on board in all actions and policy initiatives the Agenda's Sustainable Development Goals.

The task of the EIB is to contribute to the balanced and steady development of the internal market in the interest of the European Union. In July 2007, in congruence with the EU Energy Action Plan, the EIB issued the first Climate Awareness Bond (**CAB**) with a focus on renewable energy and energy efficiency. The goal was to increase accountability of disbursements via precise eligibility criteria and to provide transparent impact assessment to capital markets.

Sustainability Awareness Bonds (**SABs**) complement CABs by extending the same approach from climate to further areas of environmental and social sustainability. The proceeds of the Bonds will be allocated to the EIB's lending to activities contributing to sustainability objectives in line with evolving EU sustainable finance legislation, including the EU Taxonomy Regulation, e.g. those included in the EU Taxonomy Regulation at this stage:

- sustainable use and protection of water and marine resources;
- transition to a circular economy;
- pollution prevention and control; and
- protection and restoration of biodiversity and ecosystems.

Sustainability objectives and activities are subject to revision in the context of EU legislative developments. Such revisions will not be notified to Bondholders.

The net proceeds of the issue of the Bonds (which proceeds may be converted into euro) will be allocated within the EIB's treasury to a sub-portfolio of the operational money market portfolio. So long as the Bonds are outstanding, the balance of the sub-portfolio will be reduced by amounts matching disbursements made to eligible lending projects. Pending such disbursement, the sub-portfolio will be invested in money market instruments.

The EIB does not fall under the scope of application of the MiFID II package. Consequently, the EIB does not qualify as an "investment firm", "manufacturer" or "distributor" for the purposes of MiFID II.

Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Bonds has led to the conclusion that: (i) the target market for the Bonds is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Bonds to eligible counterparties and professional clients are appropriate, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Bonds (a **distributor**) should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Bonds (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

For the purposes of this provision, the expression **manufacturer** means the Relevant Dealer and the expression **MiFID II** means Directive 2014/65/EU, as amended.

EIB measures in support of REPowerEU Plan

The EIB and the European Investment Fund (together, the **EIB Group**) will support the REPowerEU Plan with an additional EUR 30 billion in loans and equity financing over the next five years. The additional funds from the EIB Group will be directed to renewables, energy efficiency, grids and storage, electric-vehicle charging infrastructure, and breakthrough technologies, such as low-carbon hydrogen.

The package of new, targeted financing approved by the EIB's Board of Directors on 26th October, 2022 is expected to mobilise up to EUR 115 billion of new investment by 2027, thus making a substantial contribution to the REPowerEU objective of ending dependency on Russian fossil fuels. It is a supplementary envelope, on top of the EIB Group's existing support for the energy sector in the EU, averaging around EUR 10 billion of financing per year over the past decade. While the additional EIB Group financing will focus on improving Europe's energy security over the medium term and avert future supply shocks, EIB support for some efficiency projects could result in lower demand for gas already in 2023.

In addition to raising expected energy-lending volumes for the next five years, the EIB's Board of Directors also adopted a series of technical and policy measures aimed at accelerating the pace and maximising the impact of the new investment. Key elements include higher upfront disbursements, longer tenors that should make EIB loans to the energy sector more attractive, and a co-financing ceiling

of up to 75 per cent. for projects contributing to the REPowerEU objectives, up from the typical 50 per cent. EIB limit per project.

Furthermore, the EIB's Board of Directors introduced a temporary and exceptional extension of the exemptions to the EIB Group's Paris Alignment for Counterparties (**PATH**) framework. In this respect, the existing exemption under the EIB Group's PATH framework for projects with high innovative content will be temporarily and exceptionally extended to include all renewable energy projects and electric-vehicle charging infrastructure inside the EU. This will allow EIB Group financing of a greater number of clean energy projects with a wider range of clients and utility companies contributing to the EU's climate objectives and energy security. The extension will run until 2027, subject to a Climate Bank Roadmap review foreseen in 2025. Over this period, the EIB will continue to engage with all its clients to support them in developing decarbonisation plans.

Put together, the package of additional financing, policy and technical flexibility, as well as dedicated support for high-risk investments, like pilot facilities, is expected to help supercharge Europe's transition to a more sustainable and secure future. It signals the EIB's commitment to deploying the full range of its financial tools and resources in response to the unfolding crisis.

The EIB Group has adopted a Climate Bank Roadmap to deliver on its agenda to support EUR 1 trillion of climate action and environmental sustainability investments in the decade to 2030 and to deliver more than 50 per cent. of EIB finance for climate action and environmental sustainability by 2025. As part of the roadmap, all new EIB Group operations have been aligned with the goals and principles of the Paris Agreement since the start of 2021.
